

Bentley SewerGEMS CONNECT Edition Readme

This Readme contains the following information:

- [“What’s New”](#)
- [“Product Tech Notes and FAQs”](#)
- [“Installation Requirements”](#)
- [“Installation Instructions”](#)
- [“Product Activation”](#)
- [“Support Information”](#)

What’s New

The following outline identifies new features and enhancements in this release of Bentley SewerGEMS CONNECT Edition:

- New Ribbon interface
- New property connection element
- Automated catchment delineation
- Energy costing

- Improved tables for engineering profiles
- Customizable reports
- AVI creation from time results
- Numerous usability enhancements

Product Tech Notes and FAQs

Product Tech Notes and answers to frequently asked questions about SewerGEMS CONNECT can be found on the Be Communities website:

http://communities.bentley.com/products/w/products_wiki/product-technotes-and-faqs.aspx

Installation Requirements

Installation requirements include:

A CD drive or access to the Internet required for product installation. The minimum system configuration for installation:

- **Operating System:**
 - Windows 7, SP1 (32 bit/64 bit)
 - Windows 8, 8.1(32/64 bit)
 - Windows 10 (32 bit/64 bit)
 - **Software Prerequisites:**
 - Microsoft .NET Framework version 4.5 (Installer will attempt to download and install this prerequisite if it is not present during installation)
 - **Platform Requirements:**
 - Bentley SewerGEMS CONNECT does not require any additional CAD or GIS software to work as a stand alone application. However SewerGEMS CONNECT can run on the following platforms (if available):
 - MicroStation V8i SELECTseries 4
 - ArcGIS 10.2, 10.2.2, 10.3, and 10.4.1
 - AutoCAD 2016, 17 (32 bit/64 bit)*
- * (SewerGEMS CONNECT for AutoCAD license required)

While SewerGEMS CONNECT was tested on these versions of platform software, it may run on earlier or later releases. However, if users want to use earlier versions of platform software, it may be advisable to use an older version of SewerGEMS CONNECT.

- **ProjectWise Support:**
- SewerGEMS CONNECT is compatible with ProjectWise V8 XM Edition or later.
- **SELECTserver:**
- Bentley SewerGEMS CONNECT requires SELECTserver XM Edition or later and will not run with SELECTserver 2004 Edition.

Minimum Profile

The minimum recommended workstation profile for running SewerGEMS CONNECT (e.g., for simple systems) is:

- **Processor:** As per minimum operating system requirements.
- **RAM:** As per minimum operating system requirements.
- **Hard Disk:** The software itself requires approximately 1.4 Gigabytes (GB) of disk space for installation, and approximately 200 Megabytes (MB) of disk space for optional lesson and sample files. Additional space is also required for user model and data files.
- **Display:** As per minimum operating system requirements.

When running SewerGEMS CONNECT in the AutoCAD or ArcGIS platforms, the minimum requirements are superseded by the minimum requirements listed for those platforms.

Installation Instructions

When you purchase SewerGEMS, you will receive an email with a license key and instruction. Save that key. Download the product file and complete installation. When you first open SewerGEMS, you will be requested to activate the license. More instructions are provided below.

To install Bentley SewerGEMS CONNECT:

1. In an Explorer window, double-click the SewerGEMS CONNECT set-up executable.
2. In the **Setup Wizard...** dialog that appears click the **Next** button.
3. After reading the License Agreement, click the "**I accept the terms in the license agreement**" radio button if you understand and agree to the License Agreement Terms and Conditions, then click **Next**. Click **Cancel** if you decline the License Agreement Terms and Conditions (note that agreeing to the License Agreement is required in order to install the product).
4. To install this product to the default directory (C:\Program Files\Bentley\) click **Next**. To change the location that Bentley SewerGEMS CONNECT is installed,
 - a. Click **Browse**.
 - b. The **Change Destination Folder** dialog box opens.
 - c. Enter the path or browse to the drive and directory where you wish to install the product or workspaces. Then click **OK**.
5. Click the **Install** button to begin the installation.
6. After the installation has completed, the final step of the wizard appears. To activate the product immediately, check the **Launch the Product Activation Wizard...** box and click **Finish**. See "[Product Activation](#)" for more details.

Product Activation

Product activation is achieved by connecting to a SELECT Server, receiving a verification that your SELECT Server Name and Activation Key are correct, and successfully posting Usage logs. Product activation is not the same as checking out a license. This document describes how to configure Bentley SewerGEMS CONNECT for activation. After initial configuration, Bentley SewerGEMS CONNECT automatically and transparently tries to activate each time it runs, and runs unconstrained for a period of 30 days after its last successful activation. However, if activation is unsuccessful for a period of 30 days, Bentley SewerGEMS CONNECT runs in unregistered mode with limited functionality.

Activating a product using the Product Activation Wizard

The Product Activation Wizard is designed to step users through the product activation process. After a product is installed, you must obtain a license and then activate that license. Obtaining the license alone is not enough to complete the process. This wizard eliminates the confusion and makes it clear that obtaining a license and activating a product are two essential steps.

If you checked the **Launch the Product Activation Wizard...** during the installation process the **Product Activation Wizard** opens automatically. See [“Installation Instructions”](#) for more information on installing Bentley SewerGEMS CONNECT.

You can also access the **Product Activation Wizard** from within the **License Management Tool**. The shortcut for the **License Management Tool** can be found in the **Bentley/SewerGEMS CONNECT** shortcut submenu. After the **License Management Tool** opens, click the **Tools** menu and select **Product Activation Wizard**.

The first screen of the Product Activation Wizard offers 4 product activation options:

- [“SELECT subscribers with a deployed \(local\) SELECT Server”](#)
- [“SELECT subscribers activating against a hosted \(Bentley\) SELECT Server”](#)
- [“NON-SELECT user”](#)
- [“Evaluation Only - No license information”](#)

The wizard steps you through the activation process based on the options selected.

SELECT subscribers with a deployed (local) SELECT Server

If you are activating against a local SELECT Server, you must provide the proper Server Name and Activation Key. The Server Name and Activation Key, along with any proxy configuration information, can be obtained from your Site Administrator.

1. Enter the name of the server in the **Server Name** field.
2. Enter the site activation key in the **Site Activation Key** field.
3. If you are using HTTPS, enable the **HTTPS (SSL)** check box.
4. If you are using a Proxy server to connect to the hosted SELECT Server, click the **Proxy** button and fill in the **Proxy Server** information then click **OK**.
5. Click **Test Connection** to verify the connection to the SELECT Server.
6. Click **Next**. The **Wizard Selections** dialog box displays the information provided on the previous

- dialog boxes.
7. Review the information and click **Finish** to activate the product.

Important note for System Administrators: Bentley SewerGEMS CONNECT will not run with Bentley SELECT Server 2004 Edition (V8.5.2 and earlier). The latest version of Bentley SELECT Server can be obtained from the [Downloads/ MySELECT CD](#) area of [SELECTservices Online](#). Please note that you will need to obtain a new license file if you upgrade to a newer version of Bentley SELECT Server. Contact the [Bentley Sales Support Center](#) that services your area for information on upgrading your current Bentley SELECT Server license file.

SELECT subscribers activating against a hosted (Bentley) SELECT Server

If you are activating against a hosted (Bentley) SELECT Server, the Server Name is pre-populated but you must provide the proper Activation Key provided by the [Bentley Sales Support Center](#).

1. Enter the site activation key in the **Site Activation Key** field.
2. If you are using HTTPS, enable the **HTTPS (SSL)** check box.
3. If you are using a Proxy server to connect to the hosted SELECT Server, click the **Proxy** button and fill in the **Proxy Server** information then click **OK**.
4. Click **Test Connection** to verify the connection to the SELECT Server.
5. Click **Next**. The **Wizard Selections** dialog box displays the information provided on the previous dialog boxes.
6. Review the information and click **Finish** to activate the product.

NON-SELECT user

If you are not a Bentley SELECT subscriber and you are activating SewerGEMS CONNECT, you are presented with three options:

- [“I have a license file ready to import”](#)
- [“I have an activation key”](#)
- [“I do not have any license information”](#)

I have a license file ready to import

1. Enter the path to your license file (or Browse to the location of your license file) in the **License File** field.
2. Click **Next**. The **Wizard Selections** dialog box displays the information provided on the previous dialog boxes.
3. Review the information and click **Finish** to activate the product.

I have an activation key

1. Enter the site activation key in the **Site Activation Key** field.
2. If you are using HTTPS, enable the **HTTPS (SSL)** check box.
3. If you are using a Proxy server to connect to the hosted SELECT Server, click the **Proxy** button and fill in the **Proxy Server** information then click **OK**.

4. Click **Test Connection** to verify the connection to the SELECT Server.
5. Click **Next**. The **Check out license now?** page displays.
6. Enter your Email address in the **Email Address** field.
7. Select the product to be activated (if not pre-populated) in the **Product Name** field.
8. Enter the product version number (if not pre-populated) in the **Product Version** field.
9. Click **Next**. The **Wizard Selections** dialog box displays the information provided on the previous dialog boxes.
10. Review the information and click **Finish** to activate the product.

I do not have any license information

1. The product will run in evaluation mode.
2. Click **Go To Bentley.com** to request activation information.

Evaluation Only - No license information

1. The product will run in evaluation mode.
2. Click **Go To Bentley.com** to request activation information.

Important note: If the workstation on which Bentley SewerGEMS CONNECT will be running does not have regular network access for periodic activation (at least every 30 days), then consider utilizing a checked-out license. Checked-out licenses are considered to be in full-time use and Bentley SewerGEMS CONNECT will not attempt to post usage for the duration of the license term. Please see the Bentley SewerGEMS CONNECT documentation for details on obtaining a checked out license.

Technical Support

Users have several ways to obtain technical support in using the models

- Answers to questions and additional product and feature information can be found on the Hydraulics and Hydrology Community Wiki:
http://communities.bentley.com/products/hydraulics___hydrology/w/hydraulics_and_hydrology___wiki/3436.selectsupport-technotes-and-faqs.aspx
- Post questions to the Forum:
http://communities.bentley.com/products/hydraulics___hydrology/f/5925/t/83906.aspx
- Submit issues and questions using the Service Request Manager on the Personal Portal:
<https://connect.bentley.com/>

Known Issues

Docking Windows in the AutoCAD Platform:

Occasionally when SewerGEMS CONNECT windows are first docked in the AutoCAD platform the window width is set to zero. The user must manually resize these windows before they become visible by dragging the border on the far left of the main AutoCAD application window.
